Course Description:

This course is designed to help you create greater success in college and in life. This is achieved by helping students explore who they are, understand where they come from, and decide where they are going. By applying the strategies of active learning, self-motivation, self-management, self-awareness, and interdependence you will create greater academic, professional, and personal success. The most important part of this course, however, is learning more about yourself...learning who you are as a college student and human being, and learning what it takes for you to keep yourself balanced and on course for success.

This course is a study of the 1) research and theory in the psychology of learning, cognition, and motivation, 2) factors that impact learning, and 3) application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning

inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to draw continually from the theoretical models they have learned. This course is recommended for all students, especially nontraditional students and students on academic probation and is required for students returning to college after academic suspension or by placement by the Admissions Committee.

Course purpose:

The purpose of this course is to prepare students for college and life success, equipped with knowledge, skills, strategies and tools to apply to accomplish a variety of tasks in varying contexts.

3. **Master Self-Management**, consistently planning and taking purposeful actions in pursuit of their goals and dreams
4. **Employ Interdependence**, building mutually supportive relationships that help them achieve their goals and dreams (while helping others do the same.)
5. **Gain Self-Awareness**, consciously employing behaviors, beliefs, and attitudes that keep them on course
6. **Adopt Lifelong Learning**, finding valuable lessons and wisdom in nearly every experience they have
